Angler reports are an important source of information for evaluating and improving the stocking program
Report your fishing trip or request a personal diary : **steve.scholten@ontario.ca** or **705-706-0975**

Brook trout and lake trout may be fin clipped to allow identification of naturally reproduced fish and assess stocking success
Fin Clip Codes: L: left, R: right, P: pectoral fin, V: ventral (pelvic) fin, AD: adipose fin
Rainbow and Brown Trout and Splake are not fin clipped as do not reproduce; walleye are usually too small to clip when stocked
Fish are typically stocked as spring yearlings, except rainbow trout (fall) and walleye (summer fingerlings) or as noted in CLIP column
