Fisheries Management Zone: 15

Designation for Lake Trout Management: ..... not designated

Fishing Regulation Exceptions ..... no lake-specific exceptions

Current Stocking: ..... none

Historic Stocking (last year stocked): ..... none

Contaminants (species tested): ..... no testing done

Assessment: Completed Projects:

1974 lake survey

Synopsis

Ayer's Lake is a small, shallow lake located on the Ayers Creek system in Proudfoot Township. There is no information available on the fish community in the lake. The 1974 lake survey caught an abundance of minnows, however, none were identified. The lake is currently considered a source of bait fish. It is possible that brook trout occur as they are known to be present within the watershed, though the shallow depth would provide limited habitat.
