Summary of Fisheries Studies/ Reports

Lake assessment 1980

Synopsis

Beaver Lake is entirely contained within Grundy Lake Provincial Park. At the time of the lake survey in 1980 the lake supported a self-sustaining northern pike population. It is possible that species of bass and crappie, which have been introduced to adjoining lakes have become established since that time.

In 2017, and angler reporting catching a rock bass in the lake. The presence of an established population has not been verified.
